

BEAMS

BEAMS is an Information System that provides the hospitals with information regarding Blood Units in all the Blood Banks.

The Hospital has to put in their requirement, the rest is done by BEAMS which gets all blood units information from various blood banks.

BEAMS also updates the blood units on a regular basis so that accurate and updated information is sent to the hospitals.

BLOOD BANK

- ❖ Automatic Detection of Blood Banks near the Hospital
- ❖ Information of all Blood Units of all the nearby Blood Banks displayed at the same location
- ❖ Automatic Intelligent System to update Blood Units from any of the Blood Banks
- ❖ Maintains accurate Blood Unit information all the time
- ❖ Easy User friendly interface to identify Blood Units of various Blood Types and Blood Groups
- ❖ Quick search facility where information regarding Blood Units can be searched with just a single click.
